WebLearning designs and delivers an extensive offering of Blended Learning services that improve workforce performance, increase knowledge retention, and deliver sustainable competitive advantage.

## Blended Learning Solutions from WebLearning

Blended learning is when traditional classroom teaching is combined with online learning and independent study, allowing the student to have more control over the time, pace and style of their learning.

Blended Learning is designed to enable the flexibility and diversity needed to support classroom style learning in a remote environment. Build your IT skills, save time, travel, and money. We combine on-line courses with self-paced virtual classes, study guides, instructor-led training, student mentoring, and certification preparation.

Through training solutions that are blended, you can:

- Reduce training costs
- Build robust IT skills anywhere, anytime
- Train large audiences from one source
- Prepare students for certifications
- Gain support from mentors who help students develop job skills

We offer training that is blended through public enrolment e.classes, private pre-packaged solutions, and customised offerings designed to meet your requirements. Whatever option you choose, it will be an exciting and effective new way to build skills in today's fast paced and competitive IT environment.

We will work with you to develop customized training solutions on a variety of subjects. We keep your skills competitive, and blend courseware to meet your specific training needs. Attend a live Internet-based, instructor-led training course at conveniently scheduled times. During these interactive sessions, students can communicate with the instructor and mentors who support the class.

In a real-time classroom, instructors can quickly and easily share any type of content with the online class using standards-based data, audio, and video conferencing. Instructors can put traditional content, such as presentations, on every student's screen simultaneously using a real-time whiteboard.

They can annotate the whiteboard content to convey concepts, create interactive exercises, share applications, ask questions, debate ideas in an engaging, effective environment, and even pass control to students to guide the class. Students can raise their hand electronically; send private messages to the instructor, chat with other learners, and much more.

### **Collaborative, Asynchronous learning...**

Learn in a rich, interactive learning environment where class materials, exercises, and discussions occur much as they would in a face-to-face class - but free from time or space limitations. Learners and instructors join in discussions and participate in class activities on their own schedules at their convenience. Post pages for others to see and discuss. Chat with others in real-time who are online. It is all possible with our blended learning services.

Blended Learning at WebLearning Network comes with 24-hour mentor support to guide you and a plethora of practice assessments coupled with Forums, Discussions, Chats and more....

### **A complete, flexible learning solution**

WebLearning brings your organisation a complete learning delivery and management solution that lets you start tapping the powerful benefits of the Internet. Increase the effectiveness of your organisation, lower your training expenses, and gain a competitive advantage. Address your specific business issues - such as sales training or new product introductions.

### **Transform your whole learning environment**

WebLearning makes it happen with compelling, exciting learning delivered to your employees or partners, anywhere, anytime. We offer planning and design services, content development, advanced technology, as well as management and support. WLN's experience in designing and delivering effective e-learning solutions is unequalled in the industry. For the world's most advanced e-learning services and technologies, choose Web e-Learning Solutions.

Today, a complete solution means more than courseware and Self-study CBT. You need to be able to create or purchase courses, deliver them in the way you want, as well as assess, track, and manage the entire process. Only WebLearning Network addresses all these needs, bringing your organisation a complete, powerful e-learning solution. With WebLearning, you can do all of this and much more, creating a comprehensive e-learning system that benefits your entire enterprise.

### **Distance Learning Solutions from WebLearning**

Distance Learning is the perfect complement to your e-class and eLearning training. We offer a variety of formats to help you learn in new ways. You will receive access to our training site for 12 months and can take the courses on-line or download them and take them beyond the initial 12-month ordering period. With this flexibility, you can learn whenever and however it is convenient for you, and can access the content repeatedly to refresh or further your skills.

Before using WebLearning, take a quick look at the [WebLearning eLearning demo](#) page. These demos are intended to provide you with a visual tour of how our award winning Learning Management System and eBook training guides work.
